

BAME 2123 Microcontroller Peripheral

Direct Memory Access (DMA)

Name: Liew Ee Mei

ID: 15WAR09185

Course: Microelectronics with embedded technology

Content

1. Introduction	1
1.1 Background Describe Direct Memory Access (DMA).	
2. Methodology	2
2.1 Introduce the DMA feature in stm32f429 Discovery board.	
2.2 Programming Concept	
3. Result and Discussion	7
3.1 Discuss about the difference configuration of PSIZE and MSIZE	
3.2 Transfer to another buffer done in interrupts	
3.3 Discuss the difference burst size and FIFO threshold level	
4. Reference	18
5. Appendix	19
